Science Behind Language Learning

How the languages you know
influence the languages you're
learning

Foreign Service Institute Language Difficulty Categories

Category I		
24-30 weeks (600-750 class hours)*		
✓ Danish	✓ Dutch	✓ French
✓ Italian	✓ Norwegian	✓ Portuguese
✓ Romanian	✓ Spanish	✓ Swedish

Category II		
36 weeks (900 class hours)		
✓ German	✓ Haitian Creole	✓ Indonesian
✓ Malay	✓ Swahili	

Category IV		
88 weeks (2200 class hours)		
✓ Arabic	✓ Chinese - Cantonese	✓ Chinese - Mandarin
✓ Japanese	✓ Korean	

Category III			
44 weeks (1100 class hours)			
Albanian	Amharic	✓ Armenian	✓ Azerbaijani
✓ Bengali	Bulgarian	Burmese	✓ Czech
✓ Dari	Estonian	✓ Farsi	✓ Finnish
Georgian	✓ Greek	✓ Hebrew	✓ Hindi
✓ Hungarian	✓ Icelandic	✓ Kazakh	Khmer
Kurdish	Kyrgyz	Lao	Latvian
Lithuanian	Macedonian	Mongolian	Nepali
✓ Polish	✓ Russian	✓ Serbo-Croatian	Sinhala
✓ Slovak	Slovenian	Somali	✓ Tagalog
Tajiki	✓ Tamil	✓ Telugu	✓ Thai
Tibetan	✓ Turkish	Turkmen	✓ Ukrainian
✓ Urdu	✓ Uzbek	✓ Vietnamese

L2 = second language; learned after an L1 (first language)

L2 learners *already have some language knowledge and experience*

Similar Languages: Spanish vs. Portuguese

Spanish: Todos los insectos tienen seis patas.
Portuguese: Todos os insetos têm seis patas.
All insects have six legs.

Cognates = words with similar sounds and meanings in two languages

Similar Languages: Spanish vs. Portuguese

Spanish speakers can understand

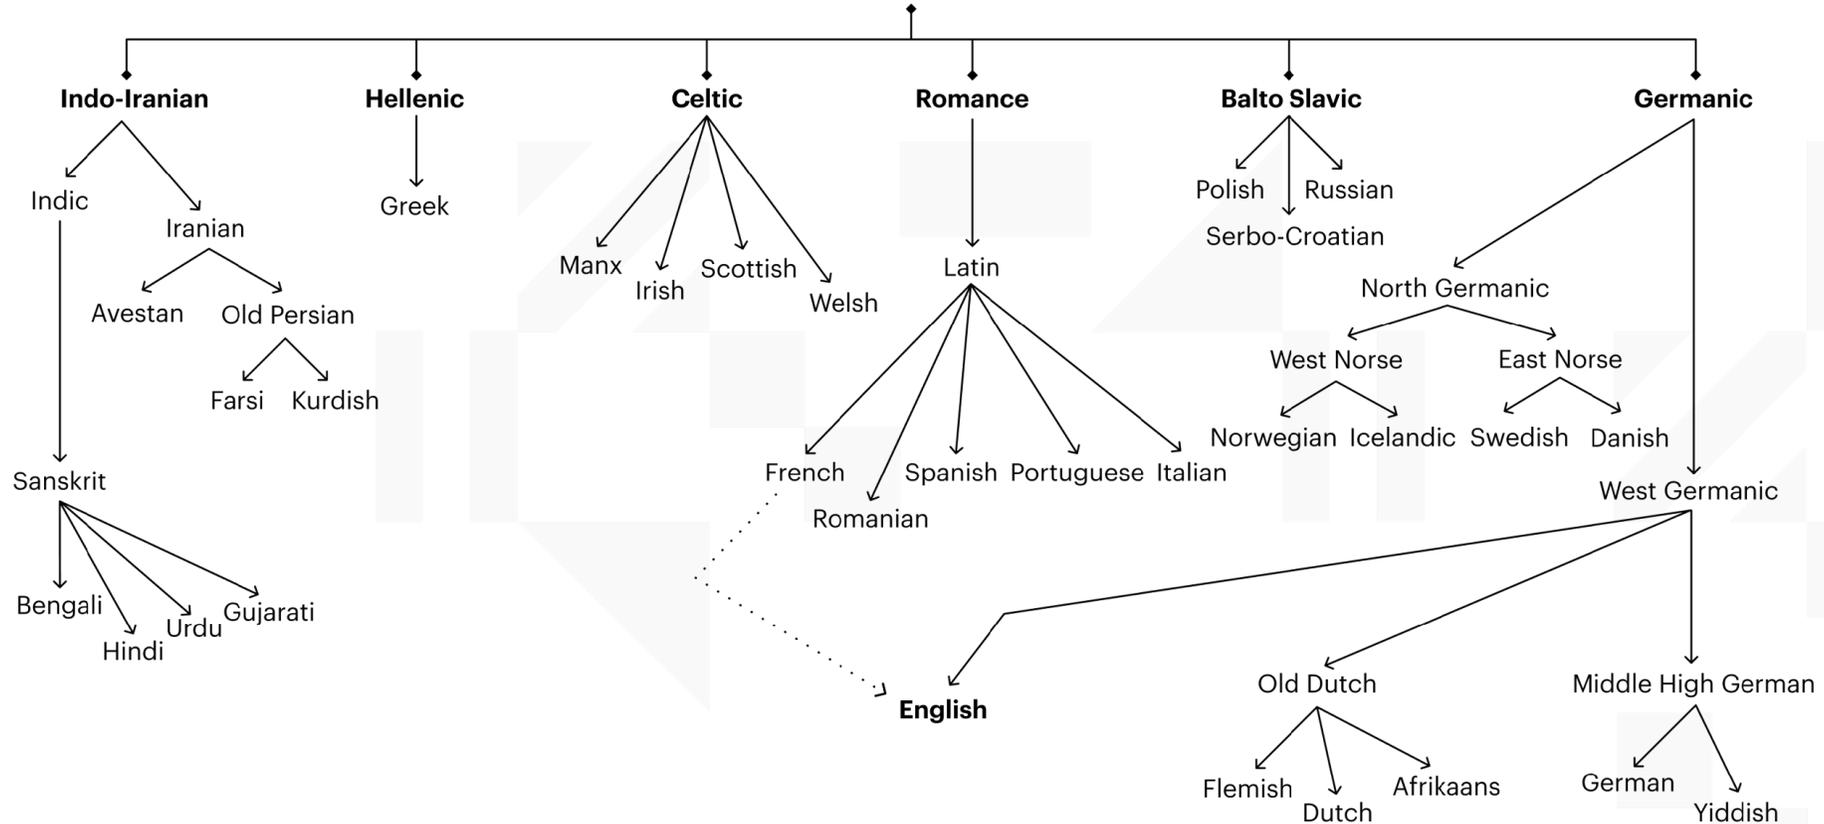

- ~50% of spoken Portuguese (Jensen, 1989)
- > 90% of written Portuguese (Henriques, 2000)

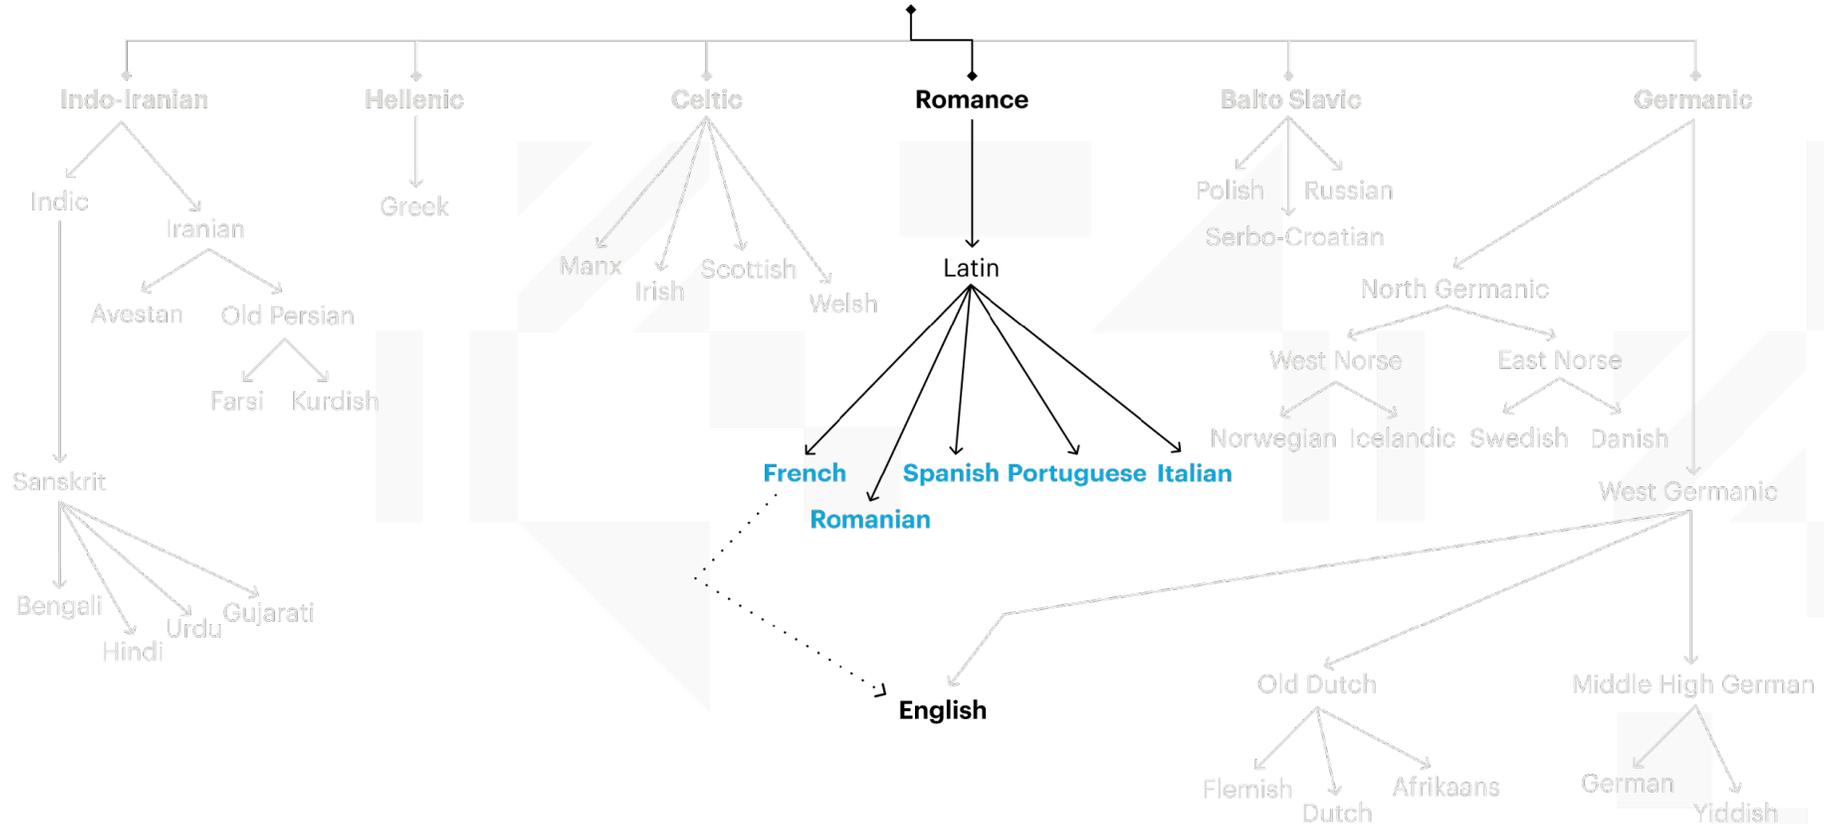

Spanish learners can communicate in Portuguese early on but miss some key differences

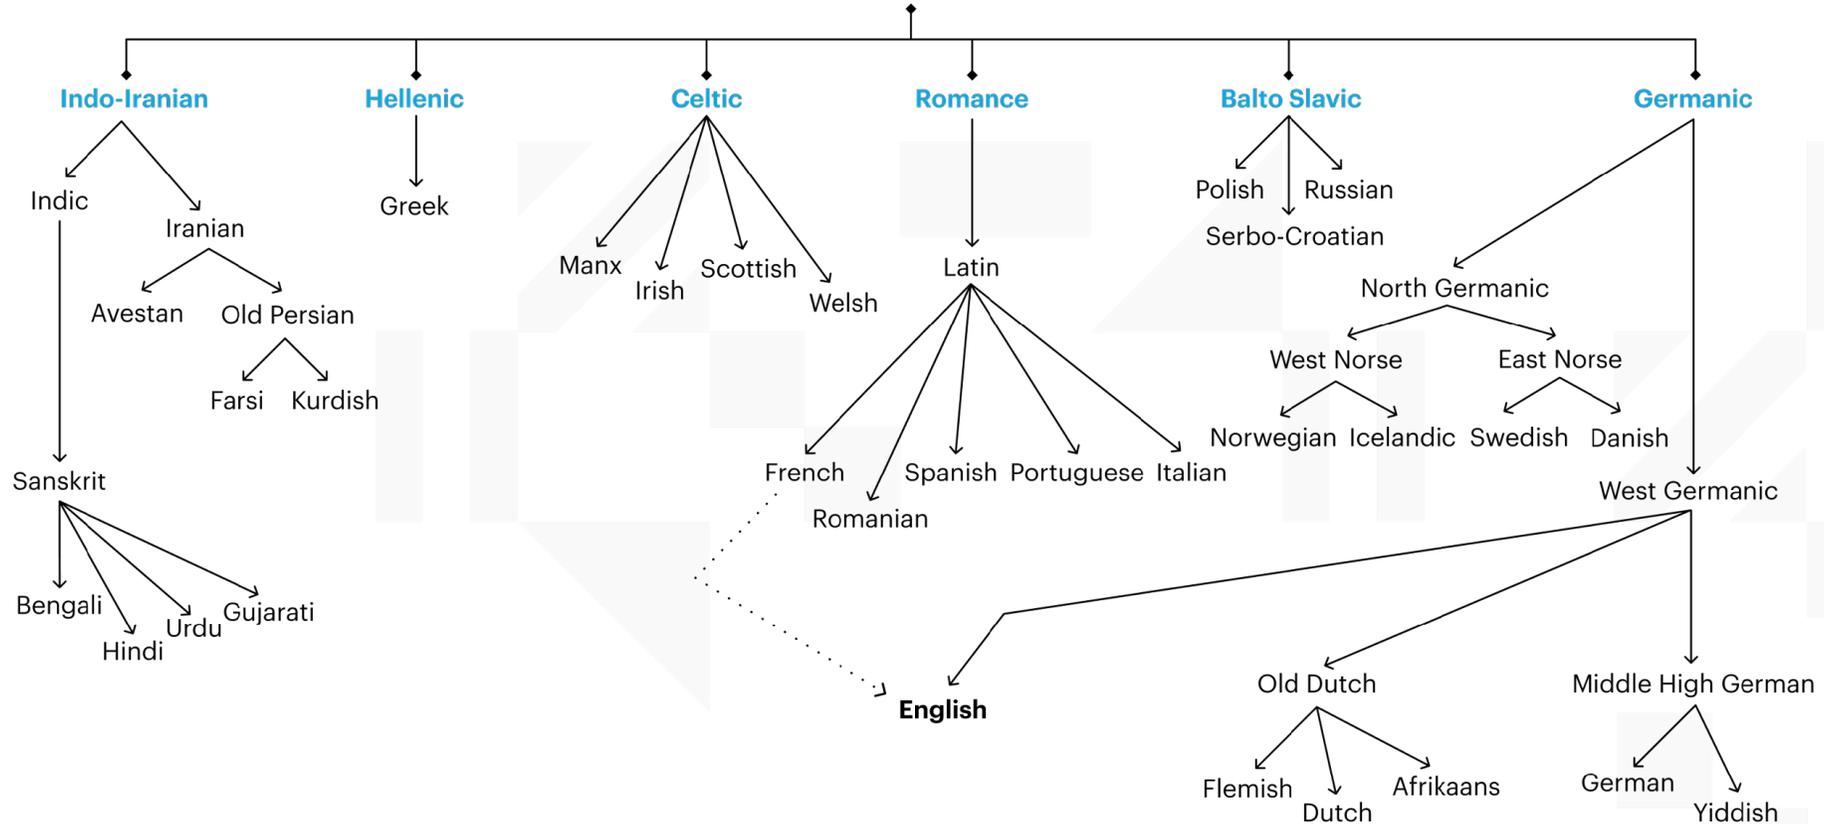

Proto-Indo-European

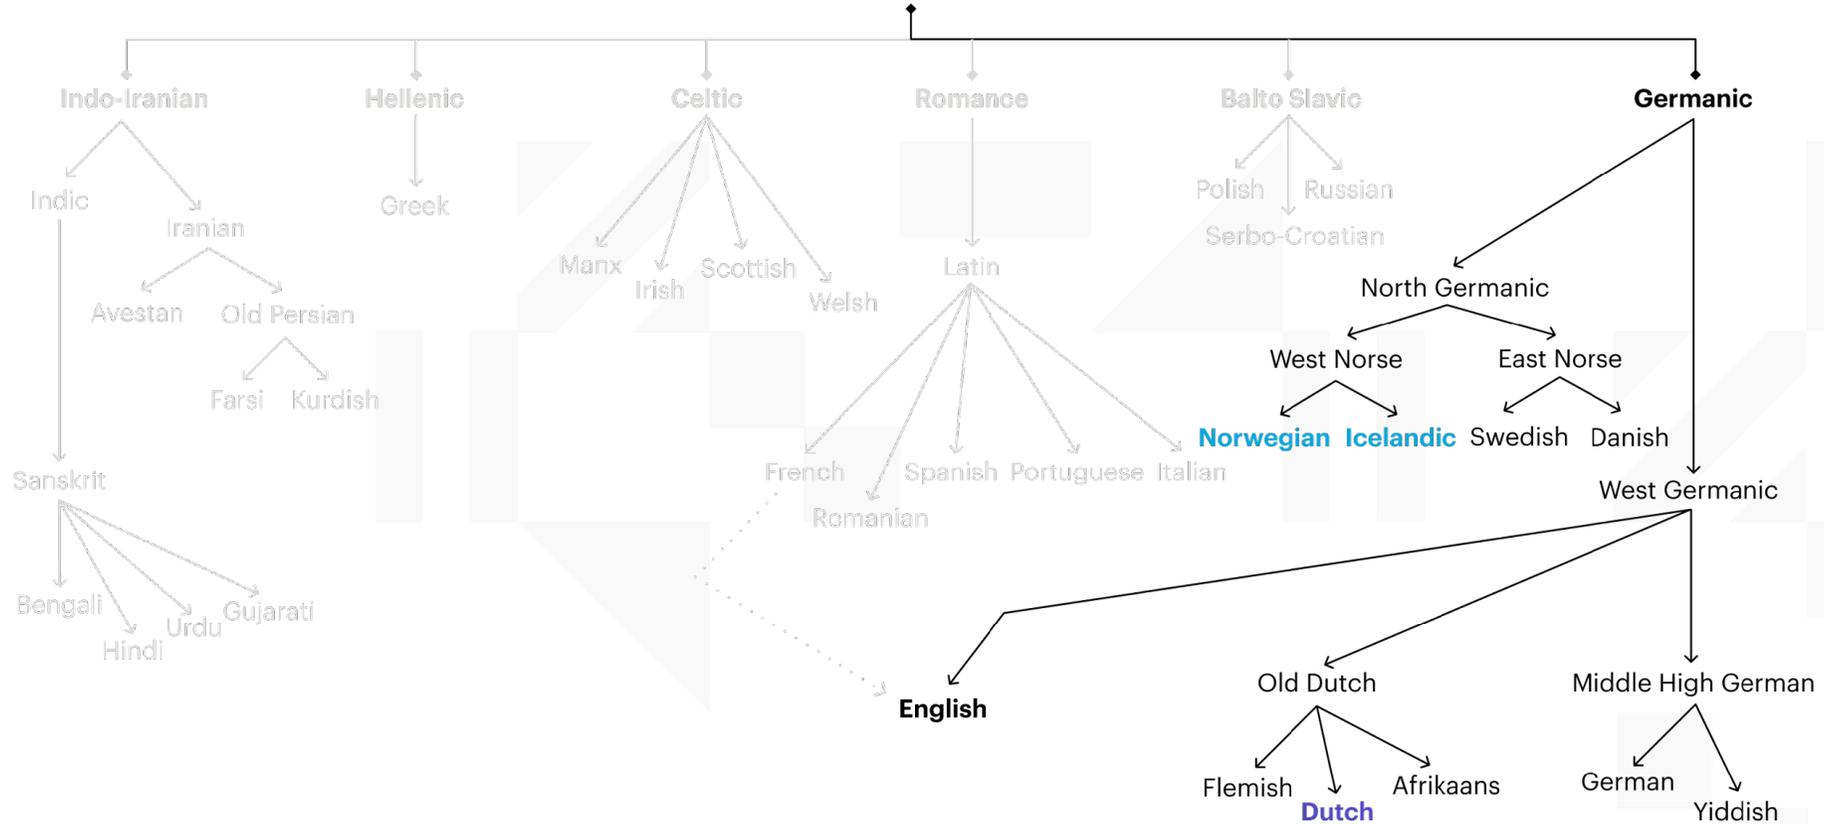

Proto-Indo-European

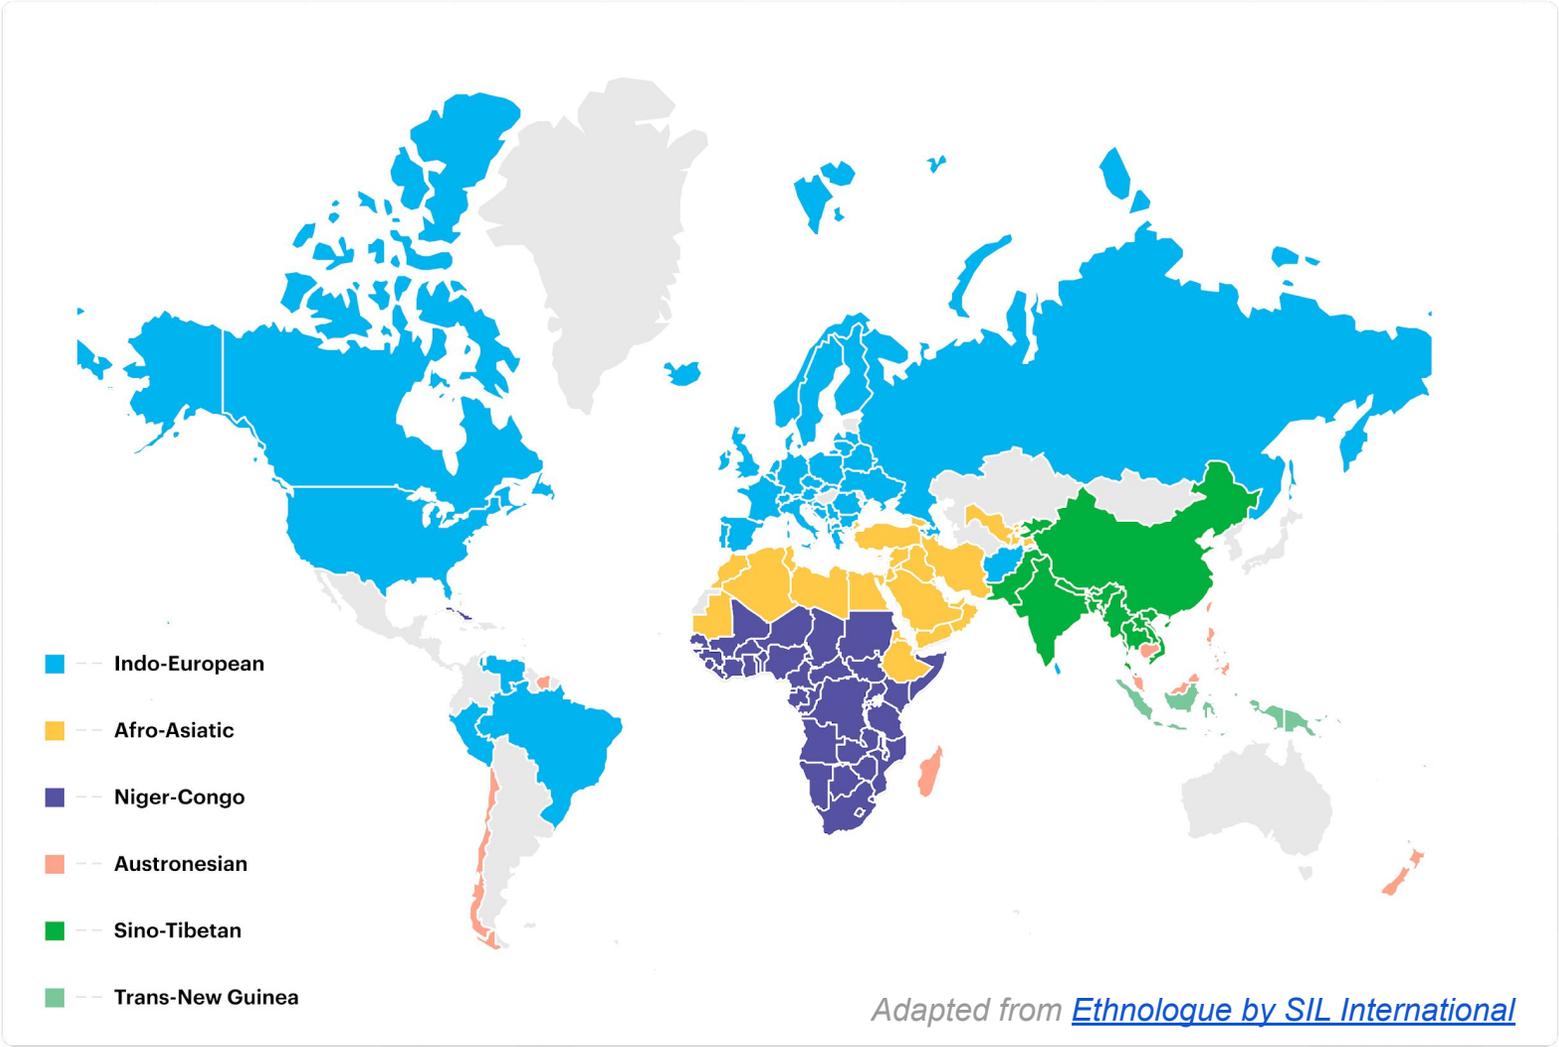

Proto-Indo-European

Cross-Linguistic Influences

How the languages you know influence each other

Cross-Linguistic Influences

How the languages you know influence each other

Positive Transfer

Learning is **facilitated** by **similarities** between the L1 and L2

Cross-Linguistic Influences

How the languages you know influence each other

Positive Transfer

Learning is **facilitated** by **similarities** between the L1 and L2

Negative Transfer

Learners make **mistakes** because of **differences** between the L1 and L2

He ate five mangos.

Il a mangé cinq mangues.

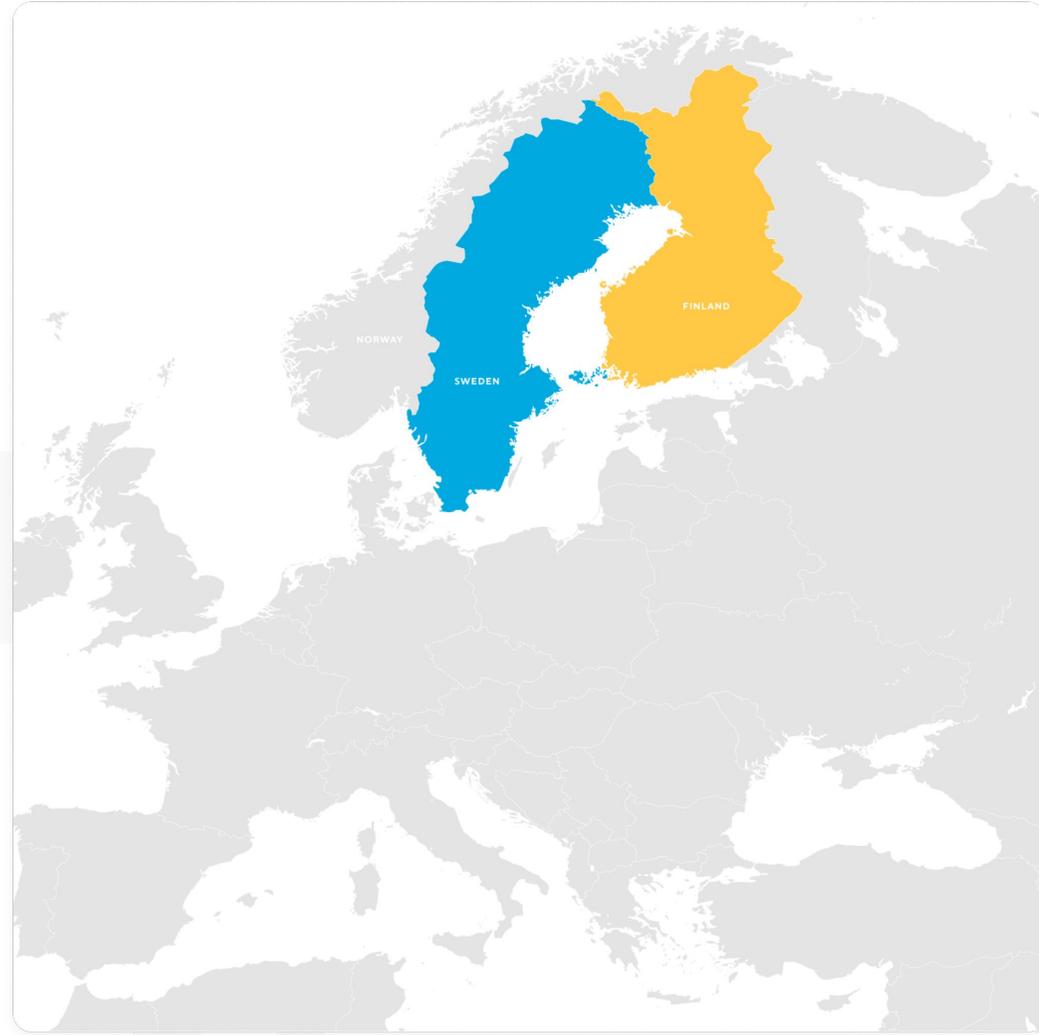

I miss you.

~~Je manque toi.*
Je te manque.~~

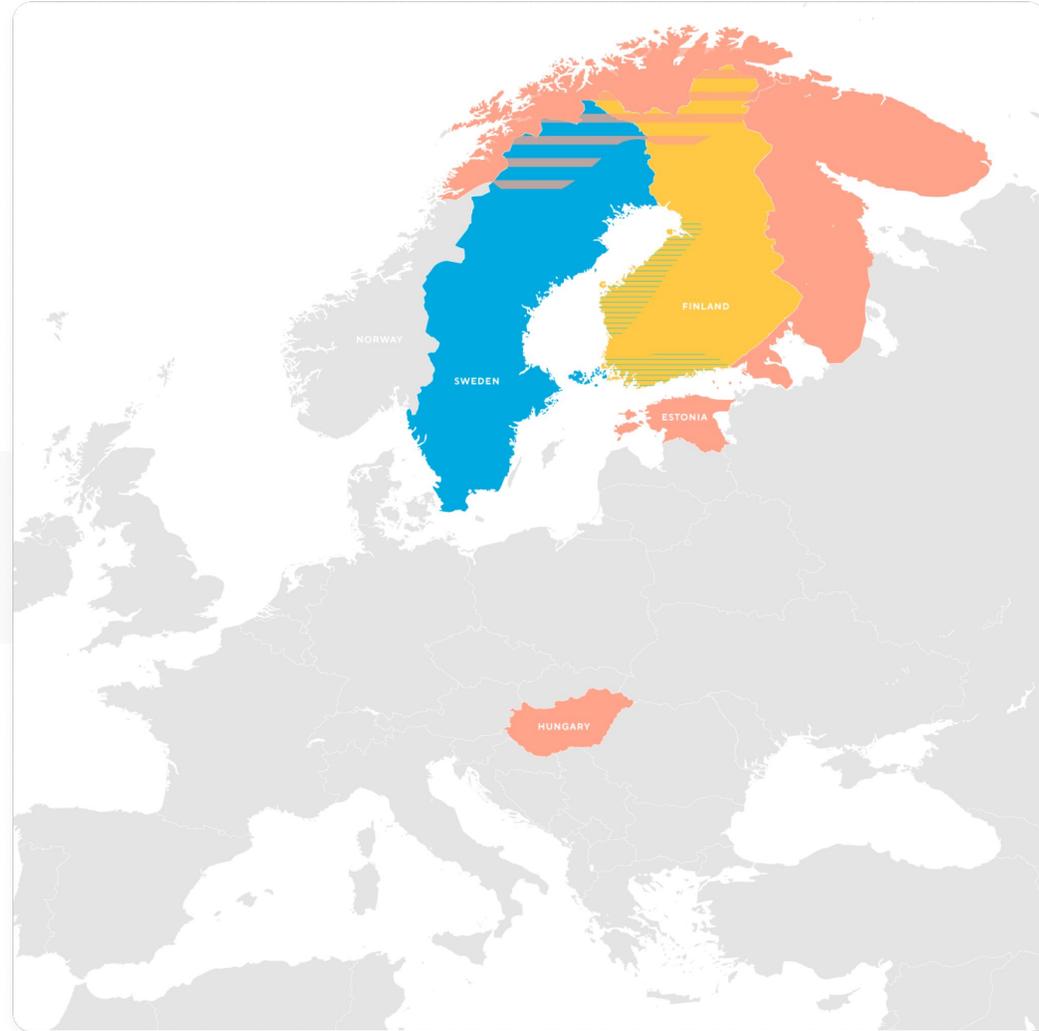

Tu me manques.

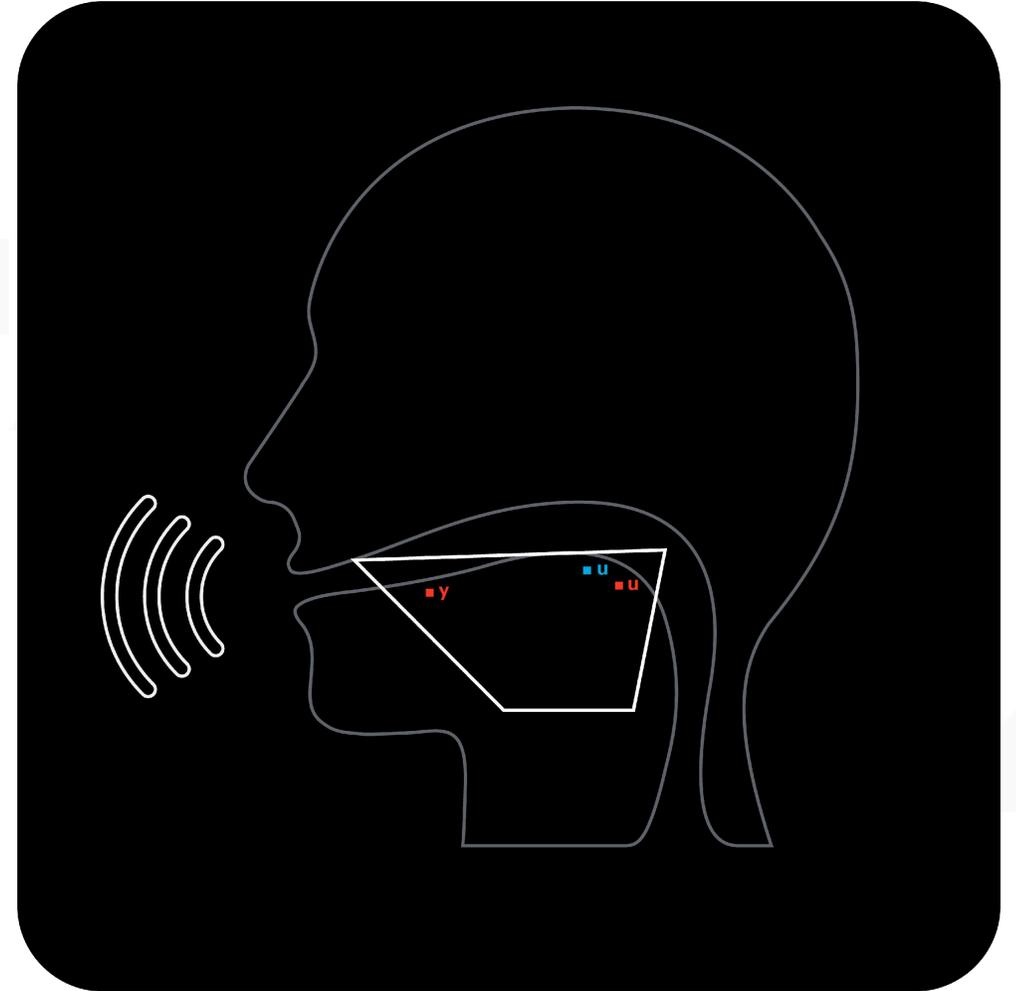

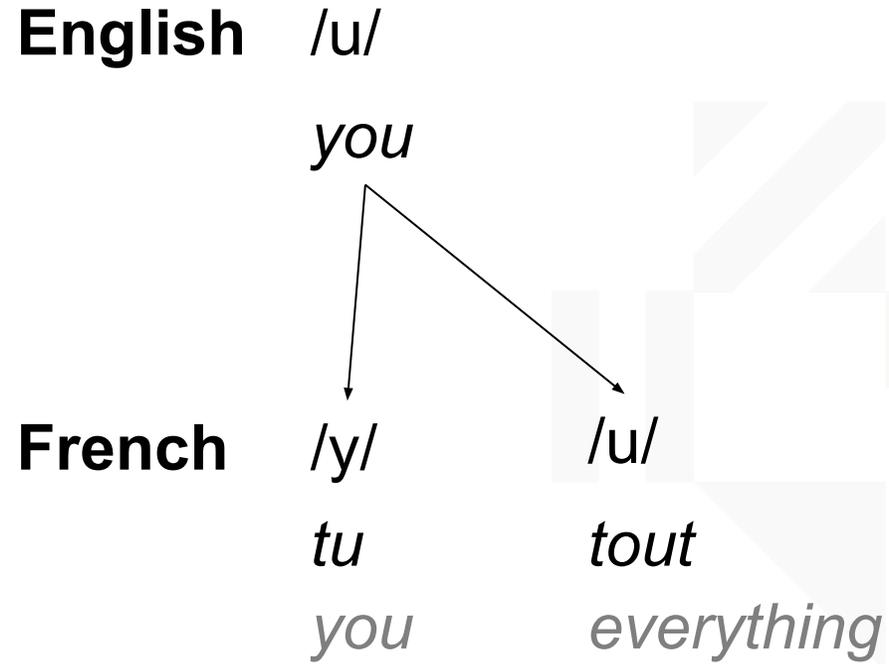

[You to me are missing.]

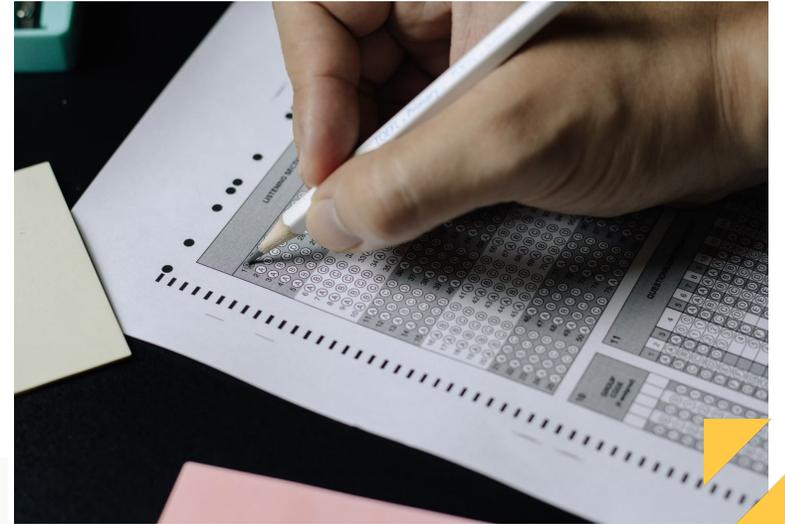

English to know

Spanish saber conocer

French savoir connaître

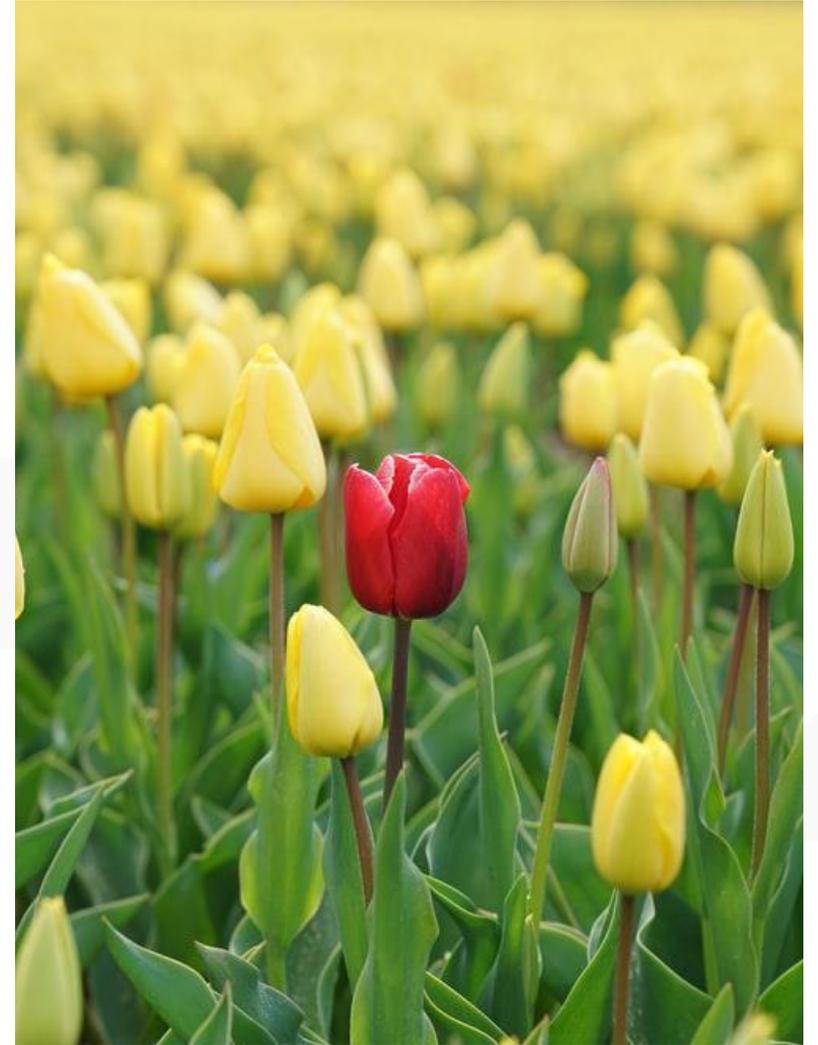

Italian sapere conoscere

German wissen kennen

Novelty Effect

Language features that are different in the L1 and L2 can be **easy** to learn if they are frequent and/or salient

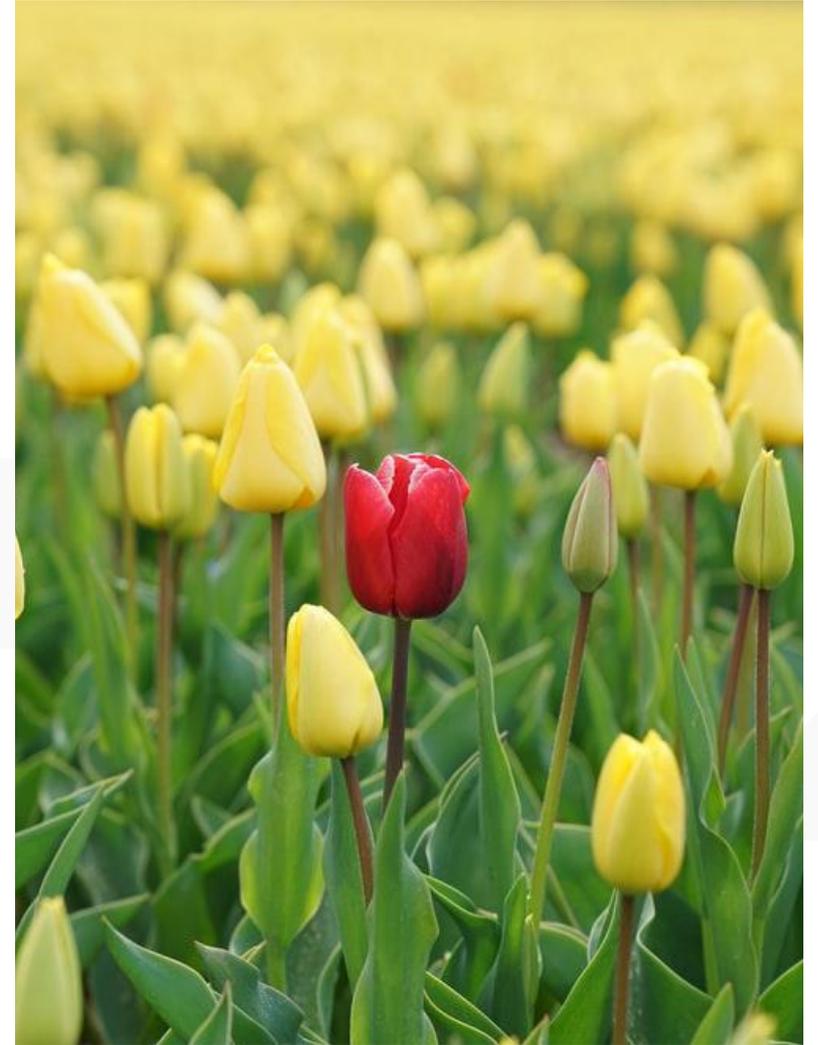

Novelty Effect

Language features that are different in the L1 and L2 can be **easy** to learn if they are frequent and/or salient

Example:

Arabic speakers learning the English progressive tense (Kleinmann, 1977)

Avoidance

Learners don't make mistakes, but it's because they avoid using a difficult feature, **not** because they've mastered it

Avoidance

Learners don't make mistakes, but it's because they avoid using a difficult feature, **not** because they've mastered it

Example:

Hebrew speakers tend to avoid phrasal verbs in English (Dagut & Laufer, 1985):

- Come in Enter
- Shut off Stop

Psychotypology

How learners *perceive* the distance between their L1 and L2

When learners think their L1 and L2 are very similar, they may not notice differences

Example:

- Italian learners may confuse German gender rules

Psychotypology

How learners *perceive* the distance between their L1 and L2

When learners think their L1 and L2 are very similar, they may not notice differences

Psychotypology

How learners *perceive* the distance between their L1 and L2

When learners think their L1 and L2 are very similar, they may not notice differences

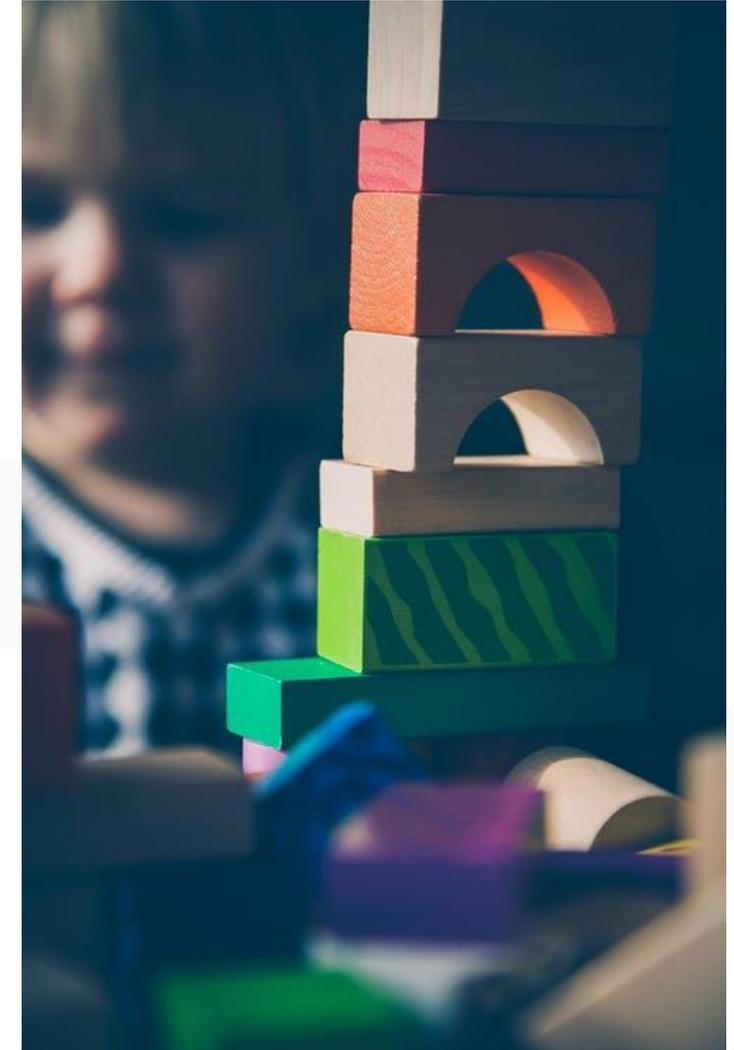

Example:

- Italian learners may confuse German gender rules

Learning a 3rd Language

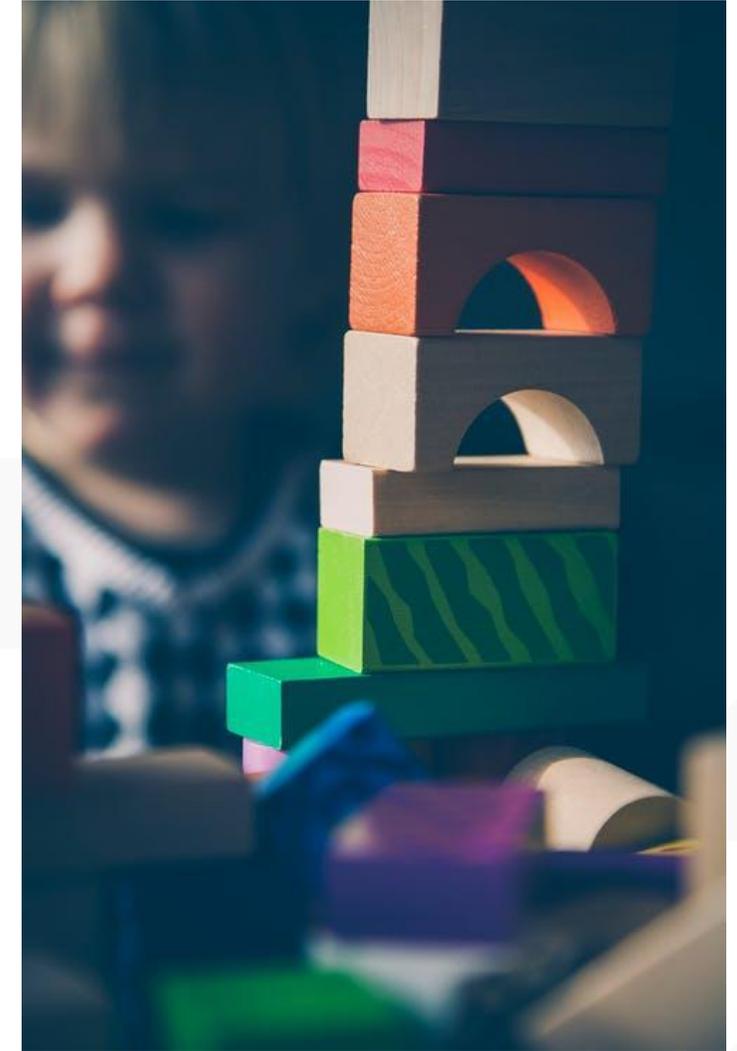

How does knowing multiple languages influence learning an L3?

Learning a 3rd Language

How does knowing multiple languages influence learning an L3?

- ✓ Opportunities for positive transfer from both L1 and L2
- ✓ Language learning skills and strategies

Learning a 3rd Language

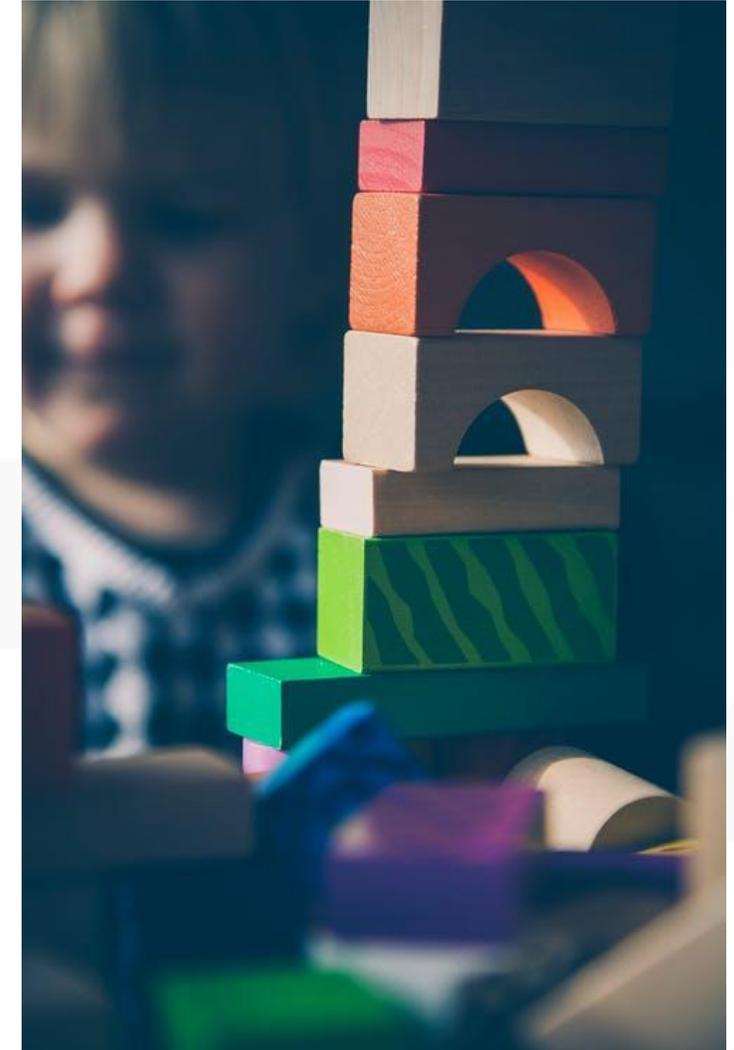

How does knowing multiple languages influence learning an L3?

Typological Primacy

Learners draw on whichever language most similar to the L3

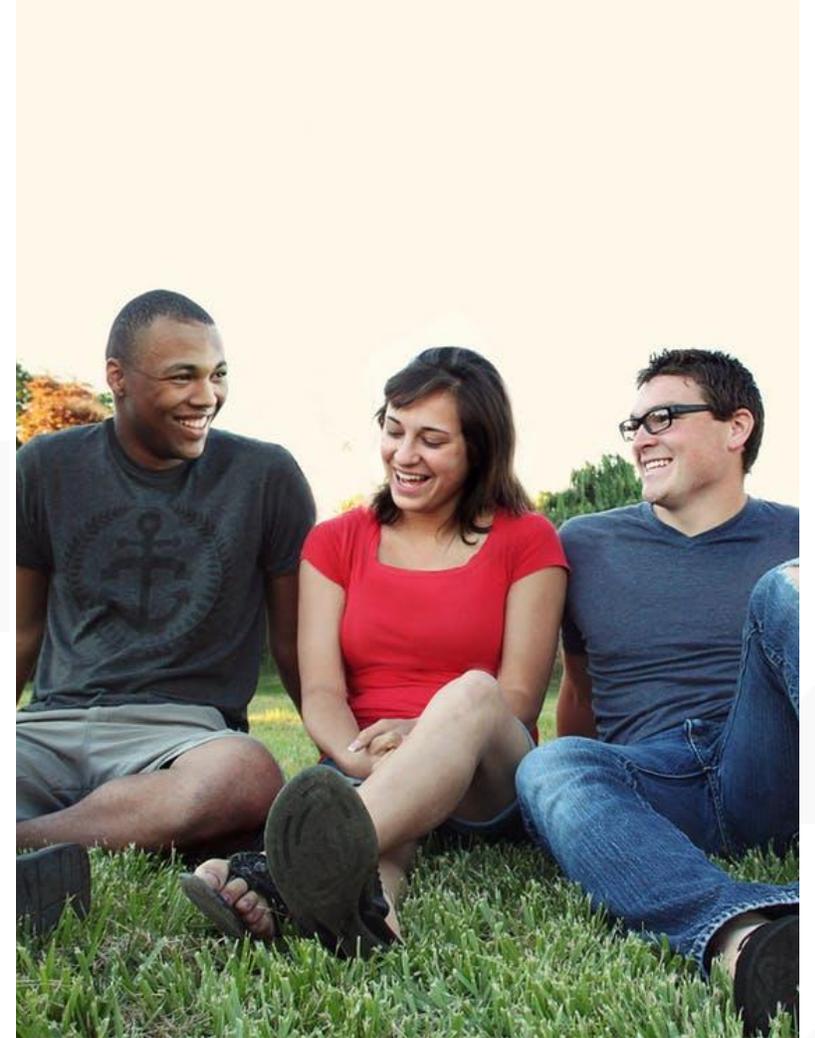

L1 vs. L2

More influence from the L2 because L2 and L3 both feel like “talking foreign”
(Selinker et al., 1995)

Let's Recap!

1. The languages you know influence the languages you're learning
2. Transfer from your L1 can be *positive* or *negative*
3. Your perception of how similar your languages are can play a role
4. Knowing multiple languages facilitates learning additional languages
